Neet Verat

WEB DEVELOPER

ABOUT

Experienced web developer with 9 months of hands-on expertise in building and maintaining responsive websites. Skilled in front-end and back-end technologies, committed to delivering high-quality user experiences.

Work Experience

Web Developer (2024-Present)

Currently working as a web developer at Cinematic Psychos, I've contributed to 10+ projects, focusing on designing and developing high-quality websites and applications. I collaborate with the team to meet client goals, ensuring optimal performance and user experience.

Freelancer (2023-2024)

Contract-Based Hiring System
Developed a contract-based hiring system to streamline recruitment, featuring a user-friendly interface and robust back-end to connect employers with candidates efficiently.

Android App for Number to Alphabet Conversion
Created an Android app to convert numbers into alphabetic format, ensuring seamless performance and smooth operation across devices.

Educational History

Bachelor of IT (2022)

I completed my Bachelor of Information Technology (BeIT) from Armeit University, gaining a strong foundation in software development, web technologies, and IT management. The program equipped me with hands-on experience in coding, system design, and database management.

Diploma (2019)

I completed my Diploma in Information Technology from Arun Muchhala Polytechnic, where I learned the basics of software development, networking, and IT systems. This program provided me with a solid foundation in essential technical areas, preparing me for further studies and professional work in the IT field.

High School (2015)

I completed my high school education at St. Xavier's English High School, where I developed an early understanding of the value of coding and technology.

Research Paper

I authored a research paper titled 'Hiring Daily Wage Workers Online: Wage and Economic Growth', which was published in the International Journal of Scientific Research in Engineering and Management (IJSREM), Volume 06, Issue 04, April 2022. The paper explores the impact of online platforms on the hiring of daily wage workers, examining how digital hiring systems influence wages and contribute to overall economic growth. The publication can be accessed via DOI: 10.55041/IJSREM12445.
